DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 10, and 31 - 38, drawn to method for establishing a communication link by selecting an appropriate mode and executing the initialization procedure, classified in class 375, subclass 222.
 - II. Claims 11 - 22, drawn to a method for testing characteristics of communication system, classified in class 375, subclass 224.
 - III. Claims 23 - 30, drawn to a communication device with carrier determination (selecting carriers) based on pre-determined carrier reduction system, classified in class 375, subclass 260.
 - IV. Claims 39 - 41, drawn to a communication device for configuring & performing handshake, classified in class 709, subclass 228.
3. Inventions I - VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are selecting a device (claims 1 - 10, and 31 - 38), which does not need the information of neither testing device for exchanging data (claims 11 - 22), nor determining carriers based on pre-determined carrier reduction system transmitting predetermined carriers (claims 23 - 30), and nor configuring handshake communication parameters (claims 39 - 41).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and by recognized divergent subject matter, restriction for examination purposes as indicated is proper.
5. Furthermore, this application contains claims directed to the following patentably distinct species of the claimed invention: group I classified in class 375, subclass 222.

6. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, group I classified in class 375, subclass 222 including claims 1 – 10 drawing to a selecting device, which does not need the information of neither claims 31 – 34 drawing to a selecting fall back procedure based on devices not able to process un-modulated carriers, nor claims 35 – 36 drawing to a selecting communication modes based on capability lists, and nor claims 37 – 38 drawing to an executing negotiation to select embedded operation channel. No claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
